01 // PROFILE

AI-native fullstack software developer based in Gothenburg with 10+ years shipping production software — websolutions both for private and public sector, industrial IoT time-series platforms, e-commerce processing real money, and public-transport systems. I take products from an ambiguous brief to a shipped binary, equally comfortable as the only developer in the room or the new senior in a team of twenty. Calm under pressure, curious, and a committed team player.

02 // EXPERIENCE

VISIONITE

2025 – Present

Västtrafik Senior Fullstack Developer

Fullstack development and infrastructure for the Traffic Information department's public-transport systems. Test-driven, agile delivery of high-quality products.

QUEENSLAB

2020 – 2024

Stena Line Senior Fullstack Developer

2022 – 2024

Backend-focused fullstack work in the Freight Team — features, integrations and APIs to external systems across all digital sales platforms. Mentored junior developers.

Emerson Senior Fullstack Developer

2021 – 2022

Built new backend services to consume and distribute IoT time-series data across an industrial IoT platform spanning 20+ developers in two teams. Mentored juniors.

Cappy Senior Backend Developer

2021

Backend services, BankID and external integrations, and devops for a new FinTech application built for a startup.

Blomsterlandet Senior Backend Developer

2021

Backend and devops within a Scrum team maintaining the client's e-commerce solution.

Handelsakademin .NET Teacher

2020

Designed and taught an advanced object-oriented .NET / C# course for a class of 25 — curriculum, materials and examinations.

Grafoket Fullstack Developer

2020 – 2021

Maintained and shipped new features across the client's web applications.

Västia Parkering Backend Developer

2020

Short-term backend development support for the team.

KNOWIT EXPERIENCE

2015 – 2020

Arctic Paper Tech Lead / Fullstack Developer

2019 – 2020

Tech Lead on a Scrum team building a new website designed to scale into a full e-commerce platform; owned technical decisions and the client relationship.

MQ Marqet Fullstack Developer

2019 – 2020

Maintained and built features for MQ's e-commerce solution and owned the integration layer to external systems.

Christian Berner Tech Lead / Fullstack Developer

2018 – 2019

Tech Lead on a Scrum team delivering a new, e-commerce-ready website; owned all technical decisions and client communication.

KappAhl [Backend Developer](#) 2018

On-site consulting team maintaining and improving a large-scale e-commerce website.

Næringslivets Hovedorganisasjon [Backend Developer](#) 2017 – 2018

On-site in Oslo, built a new order portal letting organisations create and print personalised handbooks.

Thomas Concrete Group [Backend Developer](#) 2016 – 2017

Built a Progressive Web App tracking concrete delivery from factory to construction site.

Statkraft [Fullstack Developer](#) 2015 – 2016

Agile in-house team maintaining the public website and intranet and shipping new features.
